

# Challenge Identification

Eliminator of material risks  
Contact with electrical power –  
Falling object

Area	Cross-Cutting
<b>Problem Description</b>	<p>There are potential risks of contact with electrical power and falling objects from height. This keeps us alert, worried and occupied with finding new ways to implement preventive tools to identify and control these risks. The opportunities may be behavioral, related to conditions and/or a mix of both. By solving through innovation, we materialize the elimination of these risks.</p> <p>We also seek an exclusion zone when the team needs to ensure NON-access to some mobile and fixed areas.</p>

 **Expected Results**

**Reduction of conditions (behavioral or place-related) for both risks**

 **Scope**

Standarized work
